Summary

AI-Focused Full-Stack Software Engineer with proven expertise in designing and delivering intelligent, high-performance applications and AI-driven platforms. Skilled in building **scalable backend architectures**, **responsive frontend interfaces**, **RESTful APIs**, and **cloud-native AI solutions**. Experienced across the **JavaScript** and **.NET** ecosystems — including **React**, **Angular**, **Node.js**, and **C#/.NET**. Adept at leveraging advanced AI technologies, including **LLMs**, **RAG pipelines**, and **TTS systems**, to optimize software systems, automate workflows, and deliver measurable business impact.

Core Skills

- **AI & Automation:** OpenAI API, Anthropic Claude API, Ollama, LangChain, LlamaIndex, RAG, LLM Integration, AI Agents, Prompt Engineering, AI Workflow Automation, Vector Databases, Semantic Search, AI Chatbot Development, AI Content Generation, FastWhisper, DeepL, Argos, PySpark, ElevenLabs, Edge-TTS, gTTS
- **Backend:** Python, Java, Spring Boot, C#, .NET Framework, ASP.NET Core, ASP.NET MVC, PHP, Laravel, TypeScript, Node.js, Express.js, FastAPI, Flask, Django, NestJS, Go, SQL, RESTful APIs, GraphQL, WebSockets, Microservices, Async Processing
- **Frontend:** React.js, Next.js, Angular, Vue.js, Tailwind CSS, HTML5, CSS3, JavaScript, UI/UX Design, Responsive Design
- **Databases:** PostgreSQL, pgvector, MongoDB, MySQL, SQL Server, Redis, Pinecone, ChromaDB
- **Cloud & DevOps:** AWS, Docker, Kubernetes, GitHub Actions, CI/CD, Nginx, Linux
- **Tools & Platforms:** Git, Jira, Slack, Postman, Firebase, Supabase

Professional Experience

AI-Focused Full-Stack Software Engineer — DevF

Mar 2022 – Present

Software & Tech Education / IT Services

Mexico City

- Delivered full-stack client solutions using **C#/.NET (ASP.NET MVC)**, **Java**, **Spring Boot**, **Python**, **TypeScript**, **React**, **Angular**, **Node.js**, and **PostgreSQL** across backend services, APIs, and cloud-based applications.
- Built and integrated AI workflows with **OpenAI**, **Anthropic**, **LangChain**, **LlamaIndex**, **RAG** pipelines, **TTS**, and multilingual tools.
- Improved scalability and delivery through **Docker**, **AWS**, **CI/CD** pipelines, monitoring, authentication, and database optimization.
- Developed and maintained a taxi booking platform using **PHP (Laravel framework)**, supporting real-time ride requests and driver-passenger matching.

AI & Full-Stack Software Engineer — BioHealth MX

Mar 2023 – Jul 2025

Biotechnology / Health / Wellness

Chihuahua, Mexico

- Developed AI-driven backend systems and responsive frontend modules supporting **500+ users**.
- Implemented **RAG** pipelines, AI automation, **TTS**, and translation features using **OpenAI**, **LangChain**, **LlamaIndex**, **Argos**, **ElevenLabs**, and **DeepL**.
- Optimized **PostgreSQL** queries, **Redis** caching, **Docker** deployments, and **AWS**-based infrastructure.

- Supported AI-enabled course modules using **Python**, **Node.js**, **React**, **JavaScript**, and **TypeScript**.
- Built AI prototypes for content automation with **OpenAI**, **LangChain**, and **RAG** workflows.
- Assisted with **Docker** deployments, **Git** collaboration, **SQL** optimization, **TTS**, and multilingual features.

Featured Projects

AI-Powered Property Valuation & Lead Intelligence Platform — full-stack proptech

- Built a full-stack proptech platform (**Next.js 14** / **React** / **TypeScript** frontend, **FastAPI** / **Python** backend) that turns raw real-estate listings into AI-driven valuations and investment intelligence.
- Implemented a **semantic RAG chat** over **pgvector** embeddings (OpenAI embeddings + gpt-4o-mini), answering natural-language property queries grounded in source listings.
- Generated per-property **AI valuations** — investment, risk, and buyer-fit scores with pros/cons and estimated value — plus comparable-sales statistics and neighborhood intelligence.
- Engineered an async **Celery + Redis** pipeline (ingestion, enrichment, embedding) with **JWT** auth and an interactive map, containerized via **Docker Compose** (Postgres 16 + pgvector).

Voice Learning AI

- Built an AI-powered voice learning platform using **speech recognition**, **TTS**, **translation** tools, and **LLM** workflows to support interactive language learning.
- Integrated multilingual voice features to help users practice listening, pronunciation, and comprehension.
- Designed full-stack functionality for managing learning flows, user interactions, and AI-generated responses.

AI KnowledgeBase Support Assistant

- Developed a **RAG**-based support assistant that connects knowledge base content with **LLM** responses to answer user questions accurately.
- Implemented **semantic search** and AI-driven retrieval to improve support automation and reduce manual lookup time.
- Built backend workflows for **document ingestion**, context retrieval, and response generation.

Education

B.Sc. in Software Engineering

Aug 2019 – Mar 2023

Los Valles University Center (CUVALLES)

Ameca, Jalisco, Mexico

Languages

- Spanish — Native
- English — Advanced
